PROFESSIONAL SUMMARY

Data Engineer with 3+ years of experience in the **banking industry**, where precision is key, and data accuracy is paramount. Expertise in **ETL processes, cloud data platforms, python and dashboard visualization**. Proven ability to design and manage large-scale data environments and improve data-driven decision-making. Now seeking to leverage my technical expertise and industry experience to contribute to **innovative data solutions**.

WORK EXPERIENCE

PT. Bank BTPN Syariah Tbk.

Data Engineer || *September 2021 to Present*

- Focused on **AWS Data Pipeline**, utilizing many tools to build and manage scalable data workflows.
- Developed and maintained **ETL workflows** using SSIS, ensuring seamless data flow and integration.
- Use **Python** for multiple purposes. Example: CICD pipeline for AWS, scheduler for data job running.
- Created **Tableau dashboards** for impactful data visualizations.
- Supported the technical lead by **coordinating team efforts and mentoring developers**, fostering collaboration and efficiency.

Ministry of Public Works and Housing

Data Verifier || *March 2021 to September 2021*

- Responsible for **verifying data** for construction expert certifications and business entity certifications, ensuring accuracy and compliance with relevant standards.
- **Coordinated technical guidance** sessions for certification processes, providing support and clarification to applicants and ensuring adherence to certification criteria.

EDUCATION

Diponegoro University, Central Java

Bachelor of Engineering in Computer Engineering, GPA: 3.17/4.0

Graduated: 2020

SKILLS

Programming : Python, SQL, Java

Data Engineering : AWS, SQL Server Integration Services (SSIS), Kafka, Spark

Databases : SQL Server, MySQL, Redshift

Data Visualization : Tableau

Version Control : GitLab, Azure DevOps
